

## Edit Subitem

Editing a subitem is also similar to the others.

Say we've got a Sides section, with a Chips item, which has the option for a Cheese subitem:

Click the 'Edit' icon for the Cheese subitem. You should then see something like this:

A screenshot of a modal window titled 'Edit Subitem'. It contains three input fields: 'Subitem Name' with the value 'Cheese', 'Price' with the value '0.50p', and a 'Publish' checkbox which is checked. At the bottom right, there are two buttons: 'Reset' and 'Save'.

From here you can:

- Change the subitem name
- Change its price
- Change whether or not it is published

For example:
